Conflict of interest

A conflict of interest form is an agreement that the author (s) of an article declare in connection with the publication of an article presented in its entirety as a publication ethic, including plagiarism, misconduct, forgery or submission. They have avoided duplication, and there is no commercial interest in this, and the authors have not received any payment for their work. The conflict of interest form to the readers of the work shows how the text of the article was prepared and presented by the authors. The responsible author on behalf of other authors signs and approves this form and declares the authenticity of its content. The responsible author also states that this work has not been published elsewhere before and has not been presented to another publication at the same time.
